# Flexible Partitions

- The structure belongs to the category of flexible walls.
- The wall combines maximum flexibility with perfect acoustics.
- An acoustic system in which individual modules are connected using synthetic profiles with snap-on hinges.
- FLEXIBLE PARTITIONS (Phonic) are available in various combinations: closes on one side, in the center or on both sides. It is also possible to connect several walls together. A walk-through door is also available.
- The locking stand is equipped with a handle and a gripping device that hermetically closes the wall. The cylinder is also available with a euro lock

Panel height  
**1 500 - 3 700 mm**

Sound insulation  
**28-46 dB**

Weight

**14 - 41 kg/m<sup>2</sup>**

Panel thickness  
**80-200 mm**

Flexible partitions in the office, classic interior

Flexible partitions in the apartment

# Where to use

## OFFICES

Organize the work of employees correctly. Create an additional meeting room, separate offices, separate the kitchen area from the employees' recreation area.

## CONFERENCE HALLS/EXPO

Space can bring additional profit. Create a transformable space and adapt it for various events. Separate small spaces and host multiple events in parallel, or combine spaces to host one large event.

## MEDICAL INSTITUTIONS

Safe fire-resistant structures are recommended for separating rooms in medical institutions. Separate the reception room from the examination room, fence off the waiting room or create an additional office for receiving patients.

## UNIVERSITIES, SCHOOLS

Divide students into groups in different rooms, and then remove the wall and bring everyone together for a common lesson. Conduct interactive games and focus groups.

## RESTAURANTS

Commercial premises can generate more profit if they are multifunctional. The transformable room can be divided into several halls and events can be held at the same time. A high level of sound insulation will prevent conversations and loud music from penetrating through the wall.

## PUBLIC SPACES

Use transparent structures as storefronts. Visually expand the halls of shopping malls, banks, and gyms.
