An integrated approach to get the most out of your space

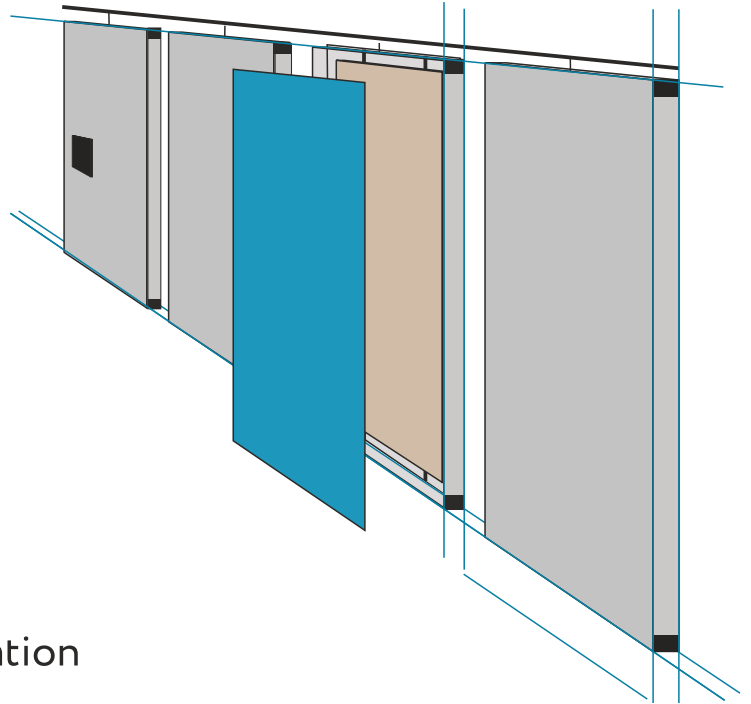

Sliding Walls

- | EI, up to 58dB, EPD and FSC certificates.

- | Fire resistance EI 30 - EI 60.

- | Mechanical, semi-automatic and fully-automatic drive.

- | Panels with “floating boards”:
easy installation, better insulation
because boards do not connect directly
to the metal frames, easy to change the boards on site.

Panel height

2 000 - 22 000 mm

Sound insulation

42-58 dB

Weight

20 - 65 kg/m²

Panel thickness

80-110 mm

Panels with Floating Boards

Every panel consist of a metal frame and separate surface boards to provide every customer the following benefits:

CHANGE OF DESIGN

You can change the design of the floating panels right on the spot

HEIGHT

Floating panels have height up to 22,000 mm. Tall panels can be easily moved along ceiling guides

POSSIBLE UPGRADE

You will have the opportunity to upgrade to a semi-automatic wall

SOUND INSULATION

The sound insulation of movable panels reaches up to 58dB of coverage on the spot

DISMOUNTABLE SYSTEM

Separate metal frames and surface boards guarantee efficient transportation, safe loading and faster installation.

Ritz Carlton. Berlin

Siam Paragon. Bangkok Thailand

Sliding walls in the interior

High-tech transformable conference room with sliding walls in the Eurotechnika company

MFC, Reuver, Netherlands

Parc des expositions (PEX) – Toulouse, France

Where to use

OFFICES

Organize the work of employees correctly. Create an additional meeting room, separate offices, separate the kitchen area from the employees' recreation area.

CONFERENCE HALLS/EXPO

Space can bring additional profit. Create a transformable space and adapt it for various events. Separate small spaces and host multiple events in parallel, or combine spaces to host one large event.

MEDICAL INSTITUTIONS

Safe fire-resistant structures are recommended for separating rooms in medical institutions. Separate the reception room from the examination room, fence off the waiting room or create an additional office for receiving patients.

UNIVERSITIES, SCHOOLS, KINDERGARTENS

Use the panels as a projector screen or magnetic whiteboard. Divide students into groups in different rooms, and then remove the wall and bring everyone together for a common lesson.

RESTAURANTS

Commercial premises can generate more profit if they are multifunctional. The transformable room can be divided into several halls and events can be held at the same time. A high level of sound insulation will prevent conversations and loud music from penetrating through the wall.

GYM AND DANSE HALLS

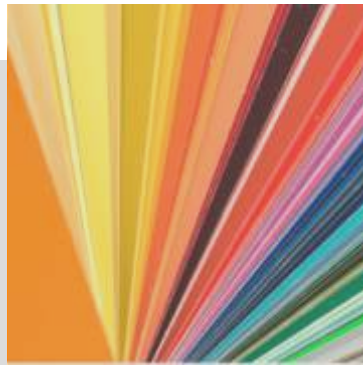

Conduct various classes at the same time, dividing the room with a sliding wall. You can also rent out part of the premises, as sliding walls allow you to make a separate entrance.

Variety of surfaces materials

We will select for you the finishing option that best suits your interior. We work with the best suppliers around the world, so we can offer a wide range of top quality coatings.
