Relaxation area in the office of the IT company Runetsofs

Kindergarten. Separating the study area from the relaxation area

# Folding Partitions in the interior

Restaurant Grill station. Separation of two halls

Allocation of a meeting room in the office

Allocation of an additional classroom at school

# Where to use

## OFFICES

Organize the work of employees correctly. Create an additional meeting room, separate offices, separate the kitchen area from the employees' recreation area.

## CONFERENCE HALLS/EXPO

Space can bring additional profit. Create a transformable space and adapt it for various events. Separate small spaces and host multiple events in parallel, or combine spaces to host one large event.

## MEDICAL INSTITUTIONS

Safe fire-resistant structures are recommended for separating rooms in medical institutions. Separate the reception room from the examination room, fence off the waiting room or create an additional office for receiving patients.

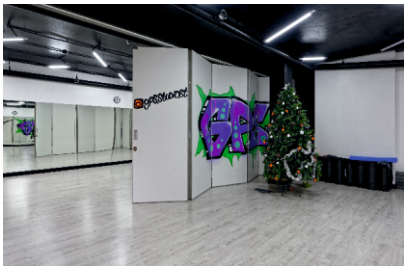

## UNIVERSITIES, SCHOOLS, KINDERGARTENS

Use the panels as a projector screen or magnetic whiteboard. Divide students into groups in different rooms, and then remove the wall and bring everyone together for a common lesson.

## RESTAURANTS

Commercial premises can generate more profit if they are multifunctional. The transformable room can be divided into several halls and events can be held at the same time. A high level of sound insulation will prevent conversations and loud music from penetrating through the wall.

## GYM AND DANSE HALLS

Conduct various classes at the same time, dividing the room with a movable wall. You can also rent out part of the premises, as sliding walls allow you to make a separate entrance.

# Variety of surfaces materials
