# Innovative folding partitions

**simplicity where others complicate**

A folding partition is a soundproof structure made up of panels connected by hinges. The partition moves along a ceiling or floor-to-ceiling track and can be gathered into a parking area.

No more awkward bolts and holes—magnetic latches at the ends of the panels **automatically align the structure**, while a reliable fixation to the floor and ceiling ensures perfect stability. The control is hidden at the end, and the non-removable handle eliminates losses and operational errors.

Luxury automation: the door closes by itself, keeping the sound behind the door.

The magnetic closer at the ends of the panel silently and smoothly shuts the door, ensuring sound insulation and convenience.

**Forget about routine complexities. A folding partition offers modern design, intuitive use, and time left for what matters most. Your comfort is our engineering challenge!**

Our folding partitions not only save space by folding from wall to wall or from the center, but they also guarantee acoustic comfort with **enhanced sound insulation of 48 dB** and special coatings. The last panel serves as a door, maintaining a seamless design.

**Patented design**

# ADVANTAGES

## 1. Magnetic latches at the ends of the panels

The partition is always even

## 2. Save your time

Open the partition with one hand in 30 seconds without effort

## 3. Control of the bolt at the end of the panel

The non-removable handle will never get lost

## 4. No visible holes on the panels

Innovative magnetic latches replace old mechanisms.

## 5. Two types of fastening

Top and top-bottom track

## 6. Panels with glass

Glass inserts of any shape maintain the level of sound insulation

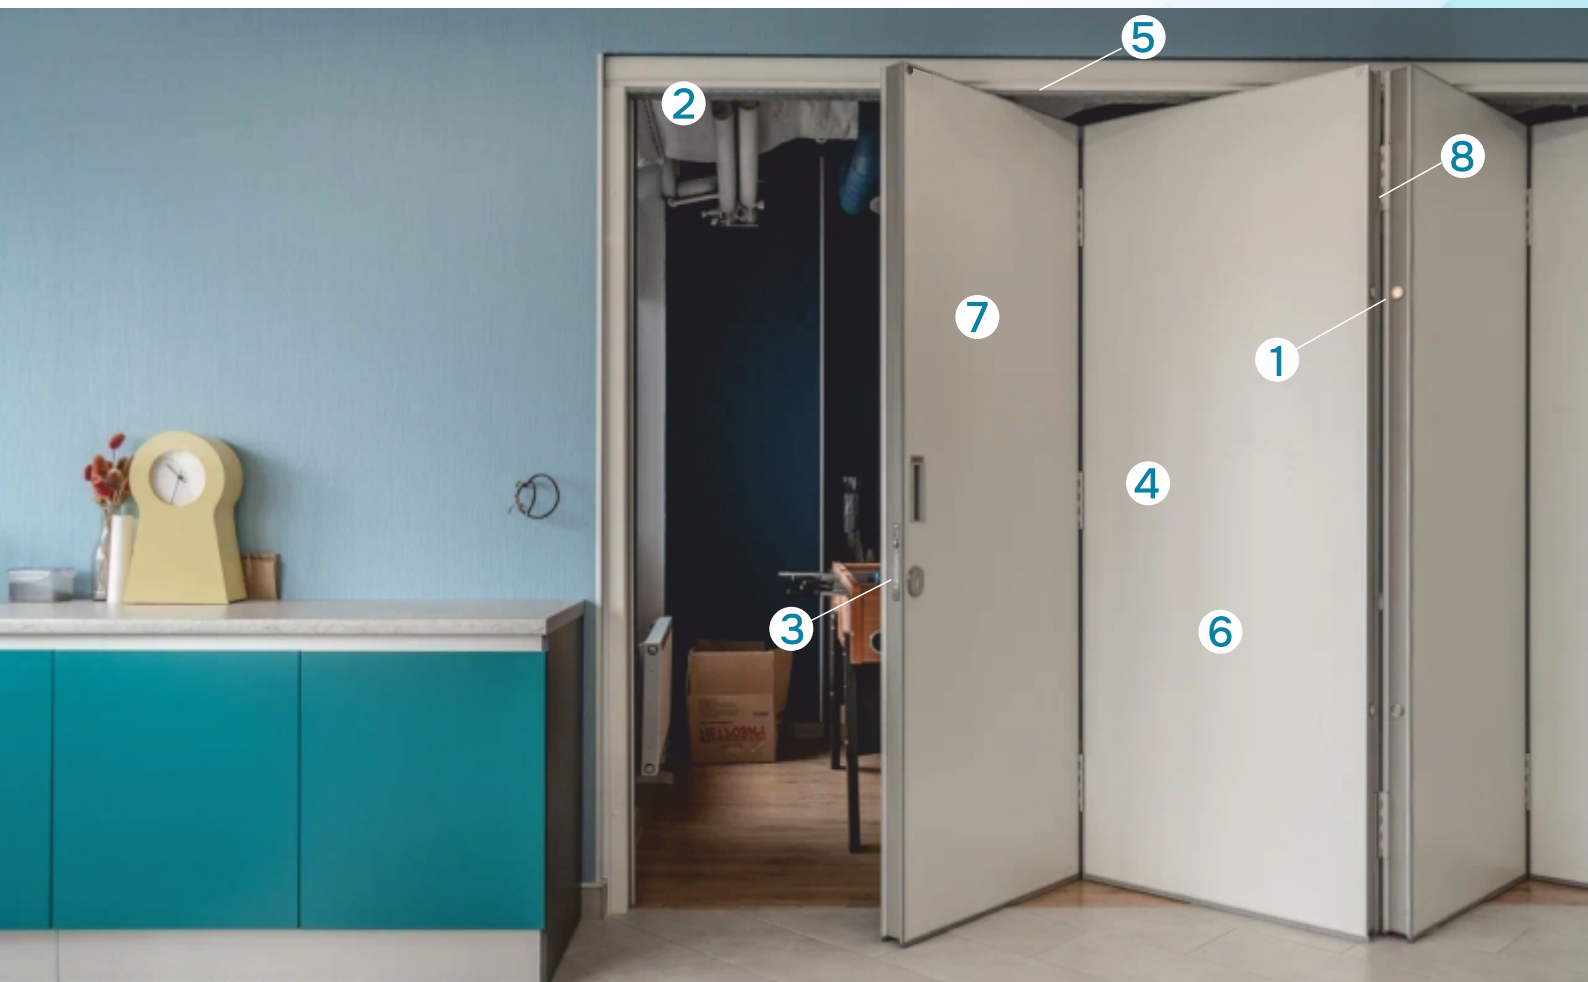

## 7. Door with closer

Magnets in the door panel act as a closer

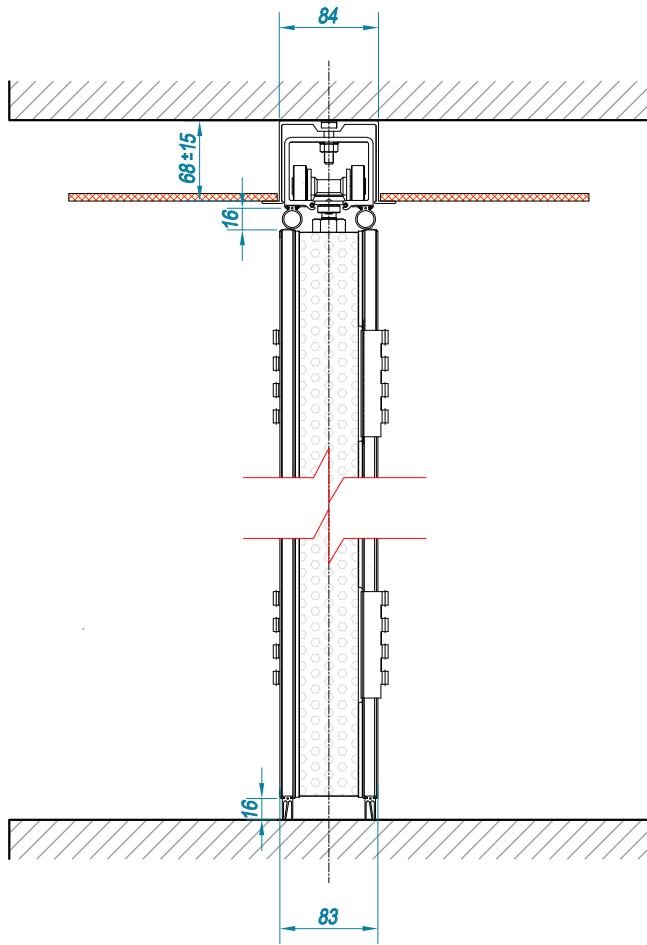

## 8. Reliable hinges

High-quality hinges ensure a rigid connection between panels

Top mount

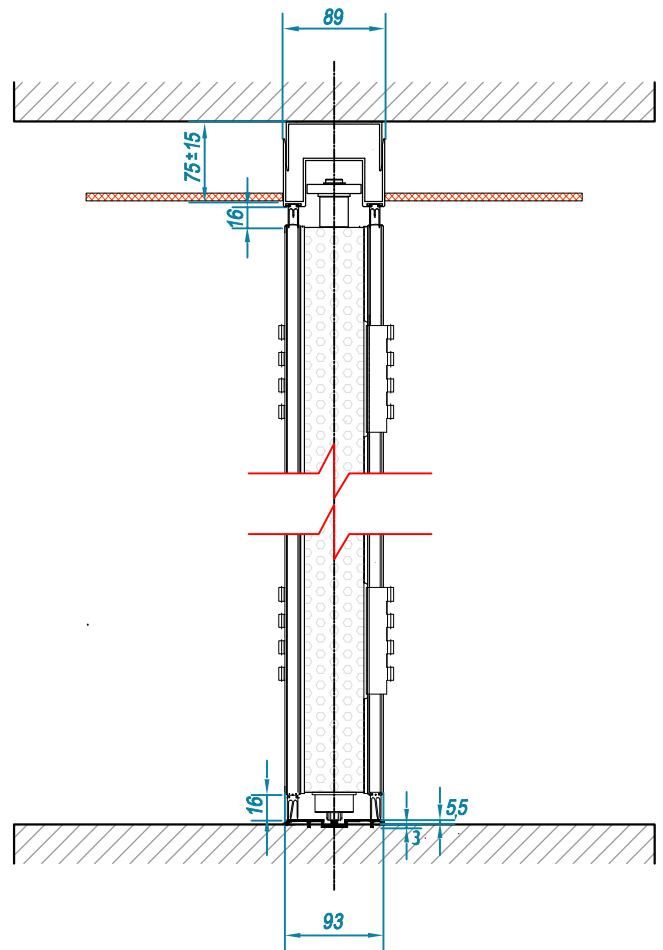

Symmetrically from wall to wall

Symmetrically from the center to the walls

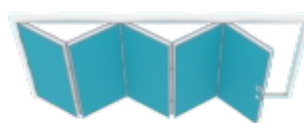

Top-bottom mount

Symmetrically

Asymmetrically

from wall to wall

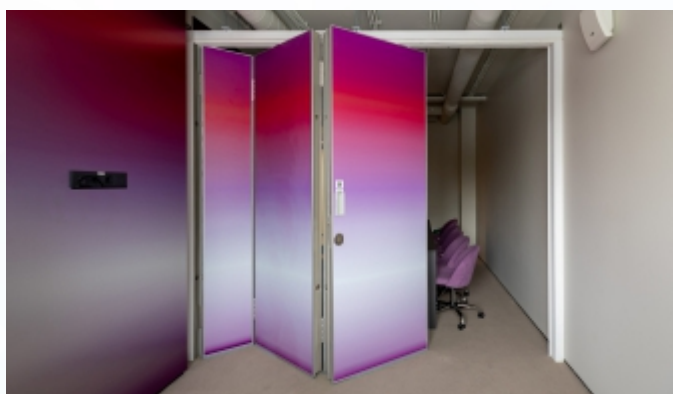

from the center to the walls

# Technical specifications

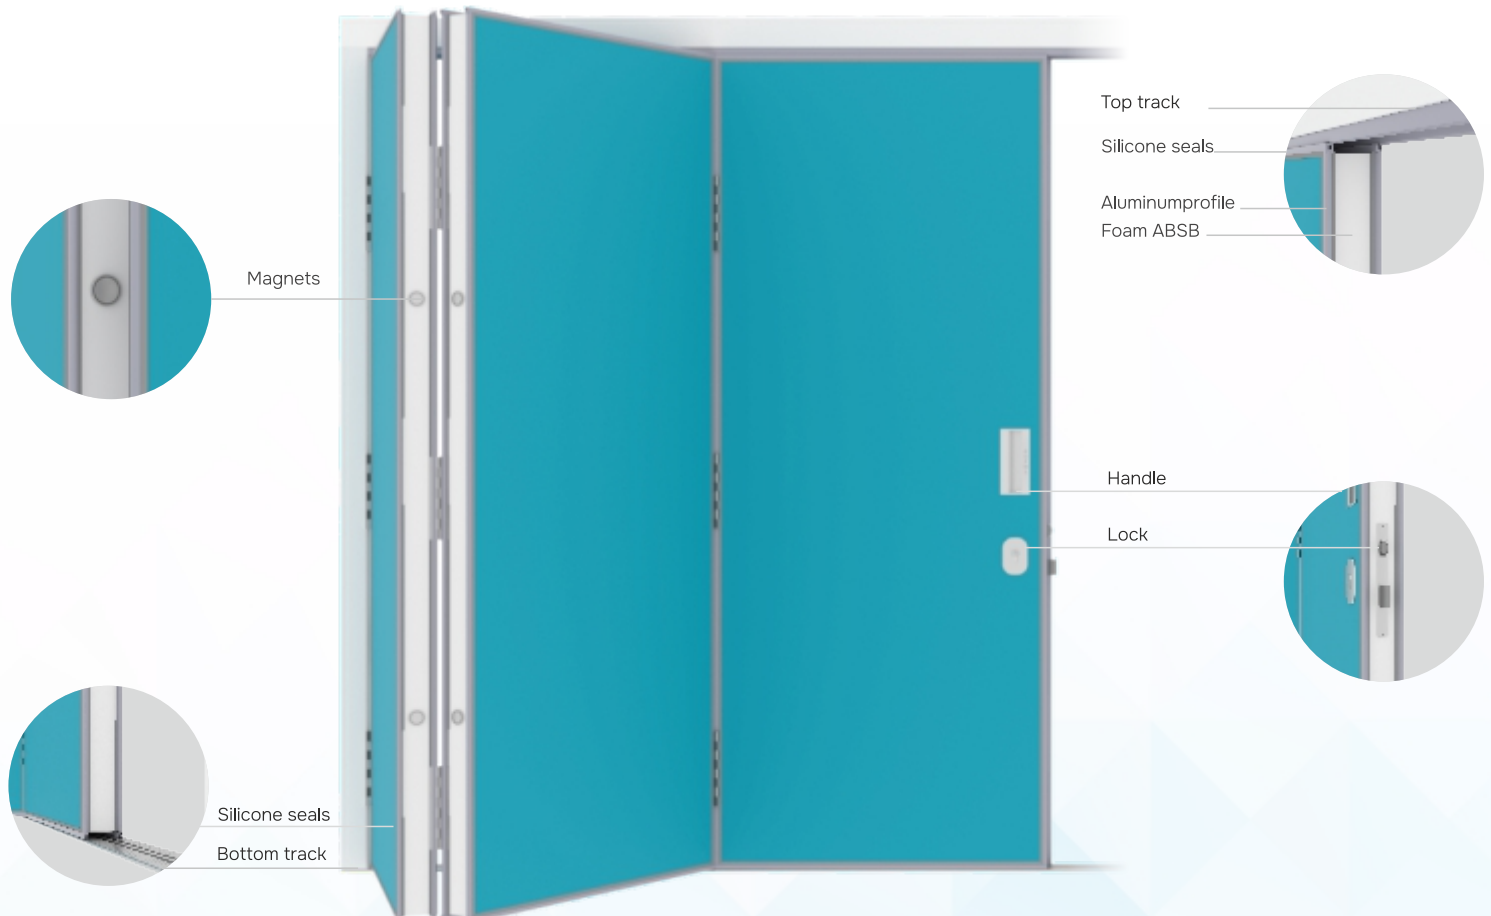

Sound insulation:	41 dB / 44 dB / 48 dB
Specific weight:	25 – 45 kg/m <sup>2</sup>
Panel height:	from 2000 mm to 5900 mm
Partition width:	from 1000 mm to 15000 mm
Profile:	Anodized aluminum / Optionally painted according to RAL catalog
Guide rail:	RAL 9010 / Anodized aluminum / Painted according to RAL catalog
Silicone seal:	Gray
Handle:	Anodized aluminum
Hinge:	Anodized aluminum
Hinge axis:	Steel
Bottom guide rail:	Anodized aluminum

**Types of finishing:** Chipboard / SML / RAL paint / Veneer / Glass inserts / Magnetic marker coating / Prints / Wallpaper / Felt / Fabric

# Manage your space - choose a premium partition!

- Seamless design – no visible holes, only harmony in the interior.
- Magnetic latches – instant fixation of panels, sound insulation up to 48 dB, the partition easily lines up perfectly.
- Auto-closing “like in a luxury suite” – the door slams smoothly by itself, without effort and noise.
- Speed and reliability – fold the partition to the walls or from the center in seconds.

# WHERE TO USE

---

## Offices

**Maximum productivity** – with folding partitions, the office can easily be transformed to meet any needs. Create quiet work zones, establish additional meeting rooms, or separate work areas from relaxation zones for employee comfort.

## Hotels

**For any event** – with soundproof folding partitions, your hotel will become the perfect venue for various occasions, from conferences to celebrations. Create flexible areas for relaxation, festivities, and business meetings without compromising service quality.

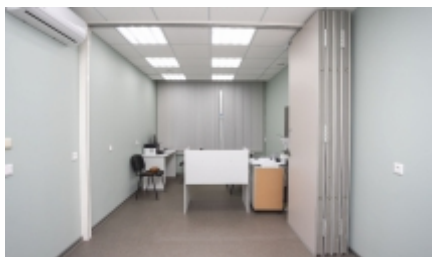

## Apartments and Privat houses

**Forget about compromises in your layout!** Folding partitions will transform your apartment or house by creating functional zones. Easily separate a home office, a playroom for the kids, or a cozy bedroom with its own space. Enjoy peace and comfort in your updated interior!

## Kindergartens and Schools

**Interactive solutions.** Create a mobile space for children, separating play and sleeping areas, providing quiet for rest at any time. Divide the space into several classes based on the class schedule. Use the panels as a projector screen or a full-screen magnetic or whiteboard.

## Hospitals and Clinics

**Safe and functional** – divide doctors' offices and waiting areas with fire-resistant and soundproof partitions to ensure confidentiality and privacy. Separate wards into individual rooms for maximum patient comfort.

## Cafes & Restaurants

**Guests will surely appreciate it.** The partitions will provide comfort and coziness, allowing events to take place simultaneously without sound interference. Choose a double-sided design for the panels and create spaces in different styles to establish a unique atmosphere.

## Gym and dance halls

**Mobile spaces for active people.** Divide the hall into several zones for different types of workouts and dance, creating maximum comfort for all participants. Folding partitions allow for changing the layout of the hall and renting out part of the space through a separate entrance.

**Collaborate with us and be at the forefront of  
architectural innovation!**
